

## Logo #2

Please describe the symbolism behind your logo design:

I wanted this logo to represent not just our state, but also represent higher education. And what better way to represent higher education than with the iconic mortarboard that every graduate wears while accepting their diplomas. The tassel in the logo is facing left to emphasize how the Nevada System of Higher Education helps students achieve their degree, and in turn, their dreams. This cap rests on the "N" that mirrors the shape of our home state. I feel a great sense of pride going to college and working towards my career. I hope my logo represents that sense of pride in both our home state and our schools.
