Correction Plan:											
<p>Reason for negative balance: Accounts are negative due to billing and procedural issues with the Joint Electronic Medical Records system and the cash impact of the EPIC system. This deficit represents one month of expenses from the various Practice Plans.</p> <p>Actions taken to correct negative balance: The Practice Plans will continue to work through the cash impact of the EPIC system by working to improve their cash position through increased productivity, improved billing, and revenue cycle metrics.</p> <p>Steps taken to ensure negative balance does not occur: UNLV School of Medicine will continue to take steps to improve productivity, revenue cycle timeliness and continued process improvements to strengthen the cash position of the Practice Plans.</p>

Correction Plan:

Reason for Negative Balance: Carry over from previous deficit due to billing, procedural and staffing issues with recent loss of full-time dentist.

Actions taken to correct negative balance: The DFP has put in place protocols to ensure that current receivables are collected in a timely manner. This plan includes increased internal monitoring of accounts receivable. Most outstanding receivables that can be recovered have been collected. Additionally, over the 2nd quarter collections have been maintained at >90%.

Steps taken to ensure negative balance does not occur: Although the search to hire a FT dentist was unsuccessful, one of the PT dentists has agreed to serve as FT dentist in the Practice. In addition, another PT dentist and a Dental Assistant were also hired. Having 1 FT and 2 PT Dentists as well as an additional Dental Assistant will allow the DFP to increase patient encounters and services daily, and thereby increase production and monthly revenue. The DFP expects revenues to have a sustained increase with a reduction to the deficit beginning mid-June 2020. This adjustment to the timeline for reducing the deficit, from March to June, results from the delay in hiring a FT dentist, as well as the time required for the part-time dentist to become credentialed for all providers.

Grant opportunities through which the DFP can provide dental services to low-income and socio-economically challenge populations are being pursued. In addition, the DFP is identifying other community non-profit organizations where partnerships can be developed to support the community needs for dental services, and thereby increase the patient base for the DFP.
