NSHE Strategic Goals

What Does it Mean to be Dual Enrolled?

- A high school student taking a college course is considered “dual” enrolled
- State law recognizes dual enrollment as a college course taken by a high school student that also applies towards high school graduation requirements (NRS 389.160)
- Concurrent versus dual enrollment

Dual Enrollment Data Dashboard

- Three basic parts (or tabs) included in the dashboard
 - Part I – Dual Enrolled High School Students
 - Part II – High School Graduating Class
 - Part III – NSHE Capture Rates
- Data Dashboard can be accessed [here](#)

Dual Enrollment Data Dashboard

- Data is presented in various fashions
 - By high school
 - By district
 - By NSHE institution
 - Disaggregated by race/ethnicity
- Graduation data is as of a point in time and graduate numbers will grow over time
- Available data is from 2012-13 through 2019-20

Data Limitations

- We cannot differentiate between a student whose dual enrollment experience was part of a formal dual and/or concurrent enrollment program from a student who enrolled in one or more college courses independently while in high school
- We cannot differentiate between a dual enrollment and a concurrent enrollment course
- One-year lag in data is due to data matching with statewide longitudinal data

The number of Nevada high school students enrolled in an NSHE course increased 235% since 2014-15 . . . but why?

The seal of the Nevada System of Higher Education is a circular emblem. It features a central scene with a sun rising over a landscape with mountains, a river, and a building. The text "NEVADA SYSTEM OF HIGHER EDUCATION" is written around the top inner edge, and "1865" is at the bottom. The motto "OMNIA PRO PATRIA" is inscribed at the bottom of the inner circle. Two stars flank the year "1865".
