**Representing someone other than yourself?:**

**Meeting:** Board of Regents Special Meeting

**Meeting Date:** May 25, 2022

**Agenda Item:** Agenda 7 Option 2 – Repeal Title 2, Chapter 12 in its entirety.

**In Favor / Opposed / Other:** In Favor

**Comment:**

There was never any legal standing or scientific basis for implementing Title 2 Chapter 12. Student vaccine requirements had ALWAYS been based on "proof of immunity", not just taking a series of shots. Employees have never had ANY vaccine requirements to be employed, or stay employed with NSHE. Yet, Title 2 Chapter 12 was drawn up and voted for based on when the students had a "temporary emergency" COVID-19 vaccine requirement. The alleged COVID-19 vaccines do NOT provide immunity, do NOT prevent infection, and do NOT prevent transmission. Keeping Title 2 Chapter 12 will only put an easy target on NSHE for lawsuits and will not alleviate the problem of filling critical open positions that the discriminatory action has already caused. Please, stop pretending and pushing that these shots are effective and important for public safety while ignoring basic nutrient deficiencies that are critical to human immune systems and natural immunity gained by those who have been infected. NSHE's Legal Counsel must have seen the obvious legal shortcomings of Title 2 Chapter 12, or maybe it was just the Regents who chose to ignore it for their political purpose or Federal Funds being dangled in front of them to follow tyrannical and Fascist policies against the public's "right" to choose what is best for them. The majority of the Public has seen and been awakened to what really happened, and they are disgusted by being manipulated,

coerced, and even forced (having their livelihood held against them) to take shots that were ineffective and unnecessary for those who have healthy immune systems. Trying to hide behind a facade of having some procedural form of legality will never last. The majority of the Public is smarter than that, and cannot be fooled indefinitely. Mistakes will only get worse with time. Learn from it now, and repeal Title 2 Chapter 12 in its entirety. Thank you.

**Agreed that all the information above is true and accurate: Yes**

**Meeting:** Board of Regents Special Meeting

**Meeting Date:** May 25, 2022

**Agenda Item:** Aesthetic appeal of new engineering building

**In Favor / Opposed / Other:** In Opposition

**Comment:**

The engineering building being built East of TBE building looks terrible. It's a cube, big whoop. TBE is bad enough trying to impress us with nonsensical stairways and inconsistent floors. You should cease construction and hire an architect that has more brain cells than a sheet of graphing paper. The university needs something new, something totally Solarpunk.

**Agreed that all the information above is true and accurate:** Yes

**Meeting Date:** May 25, 2022

**Agenda Item:** 7

**In Favor / Opposed / Other:** No Position stated – Concerned or Neutral

**Comment:**

The pandemic is not over. We are in a resurgent wave in Nevada. And there is a new outbreak of monkeypox around the world how serious remains to be seen. It is time to look forward, not to relitigate the past thirty months.

We now know that the primary transmission mechanism for Covid is virus-containing aerosol particles that we exhale, that float in the air, and that accumulate indoors. The best mitigation measures are known: vaccination, high-quality masks, and ventilation and filtration of indoor air.

Alarmingly, we still have classrooms where there is no outside air intake and no filtration of recirculated air. That's a public health hazard both for airborne virus and for wildfire smoke season.

The question is when and how to implement mitigation measures based on community transmission rates. Fortunately, we do have public health, medical, and air quality experts that can be consulted.

What we have learned in the past year is that the Board of Regents itself is ill-equipped to make these decisions or to respond promptly. Rather, it is your job to provide the System and institutions with the ability to do that.

Neither option presented in agenda item 7 is what is needed at this juncture. The Board should:

- (1) create a permanent system level advisory body that can be activated quickly to provide expert public health recommendations on matters of urgent public health and safety;
- (2) empower each institution to implement safety measures with consideration of local conditions; and
- (3) for the current situation, make urgent improvements in Indoor Air Quality for both airborne pathogens and smoke particulates, which will have long term health benefits for students and faculty.

Thank you.
